  "asteroids_in_synastry": {
    "title": "Asteroids and Synastry",
    "overview": {
      "synastry_definition": "A branch of astrology that examines how the positions of planets in one person's birth chart relate to those in another person's natal chart. A tool for assessing compatibility in love and understanding relationship dynamics by comparing key elements like the Sun, Moon, Venus, Mars, and more.",
      "purpose": "Helps identify areas of harmony, challenges, and attraction between individuals based on their astrological profiles",
      "asteroid_role": "When it comes to synastry, asteroids can come handy when trying to understand the dynamics between two people"
    },
    "asteroids": {
      "black_moon_lilith": {
        "mythology": "Unleashed, raw feminine figure who has no master and is empowered, sexual and untamed",
        "relevance": {
          "for_longevity": "Overrated and not particularly relevant for longevity and compatibility",
          "for_chemistry": "Definite indication of chemistry, especially with Venus-Lilith or Mars-Lilith contacts"
        },
        "synastry_effect": {
          "component": "Sexual chemistry and exploration",
          "experience": "You don't feel judged, shy, or self-conscious with your partner. Element of sexual spark and fun that keeps you interested and excited",
          "value": "Would not give it more value than chemistry and sexual spark"
        },
        "common_contacts": [
          "Venus-Lilith",
          "Mars-Lilith"
        ]
      },
      "chiron": {
        "represents": "Wounding and healing",
        "relevance": "Most definitely interesting in relationships. These themes are always present in important relationships",
        "common_aspects": [
          "Chiron conjunct personal planets",
          "Hard or flowing contacts to personal planets",
